DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: Applicant's cross-reference to related application should state that this application and application no. 08/986,327 (now US Patent No. RE37,552) are both reissue application of US Patent No. 5,473,526.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 47-126 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art in view of Masuda et al. Applicant's admitted prior art figure 2 discloses the claimed invention except for a charge storage element. Masuda et al. reference is being used to teach that a charge storage element as C1 in figure 1 can be used as a voltage source. Masuda et al. reference col. 2, lines 35-53 clearly states that the capacitor C1 in figure 1 is a power source capacitor having large electrostatic capacity C1 with respect to an electrostatic capacity C0 of the capacitive load. Applicant's specification col. 3, lines 46-55 also states that each capacitor CT has a capacitance, which is much larger than the load capacitance CL. Therefore it would

Art Unit: 2838

have been obvious to one having ordinary skill in the art at the time of the invention to replace the voltage source of Applicant's admitted prior art figure 2 with charge storage element in order to provide steady and cost effective power source.

3. The reissue oath/declaration filed with this application is defective because it fails to identify at least one error, which is relied upon to support the reissue application.

See 37 CFR 1.175(a)(1) and MPEP § 1414.

4. This application is objected to under 37 CFR 1.172(a) as lacking the written consent of all assignees owning an undivided interest in the patent. The consent of the assignee must be in compliance with 37 CFR 1.172. See MPEP § 1410.01.

A proper assent of the assignee in compliance with 37 CFR 1.172 and 3.73 is required in reply to this Office action.

5. Claims 47-126 are rejected as being based upon a defective reissue Declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the Declaration is set forth in the discussion above in this Office action.

6. The Reissue patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.
